DETAILED ACTION

Election/Restrictions

Previously elected claimed 33-41 includes distinct inventions. Further restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-37 and 39-41, drawn to a method of forming a balloon by a mechanical device, classified in class 604, subclass 103.06.
- II. Claim 38, drawn to a method of forming a balloon by a chemical process, classified in class 606, subclass 195.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation (mechanical process and chemical process).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3731

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
